

Technology Trends & Analysis

Maheen Sabahath

Aug 23, 2022

OUTLINE

- Executive Summary
- Introduction
- Methodology
- Results
 - Visualization – Charts
 - Dashboard
- Discussion
 - Findings & Implications
- Conclusion
- Appendix

EXECUTIVE SUMMARY

- Analysis of the competitive and dynamic tech industry
- Analysis of the three main classifications :
 - Current Technology Usage
 - Future Technology Usage
 - Demographics of the IT industry
- Top Programming Languages used
- Top Databases used
- Role of Gender in Tech

INTRODUCTION

- A visual guide to understanding trends and demographics
- Top 10 technology respondents work with and are expected to work with
 - Programming languages
 - Databases
 - Platforms
 - Web Frameworks
- Role of Gender in Tech globally
 - Respondent's age
 - Respondent's education level

METHODOLOGY

- Data used is extracted from Stack Overflow
- Survey and Analyze the current and future technological trends
- Analyze the survey of data demographics
- Data Illustration using Python and IBM Cognos Analytics
- Data Transformation
 - Data Cleaning
 - Data Wrangling
 - Data Visualization

RESULTS

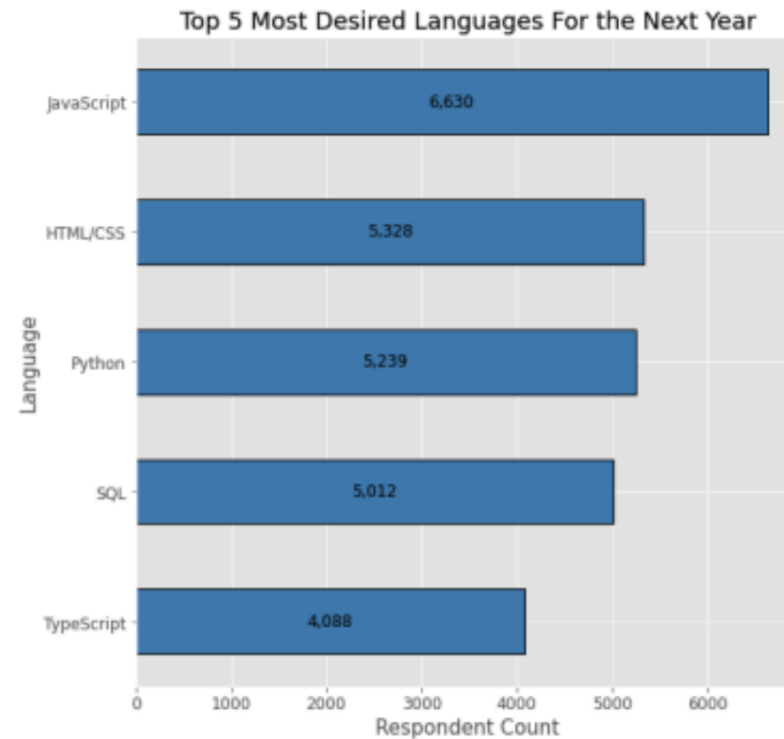

1. Programming Language Trends
2. Database Trends
3. Platform Trends
4. Web Framework Trends

PROGRAMMING LANGUAGE TRENDS

Current Year

Next Year

PROGRAMMING LANGUAGE TRENDS - FINDINGS & IMPLICATIONS

Findings

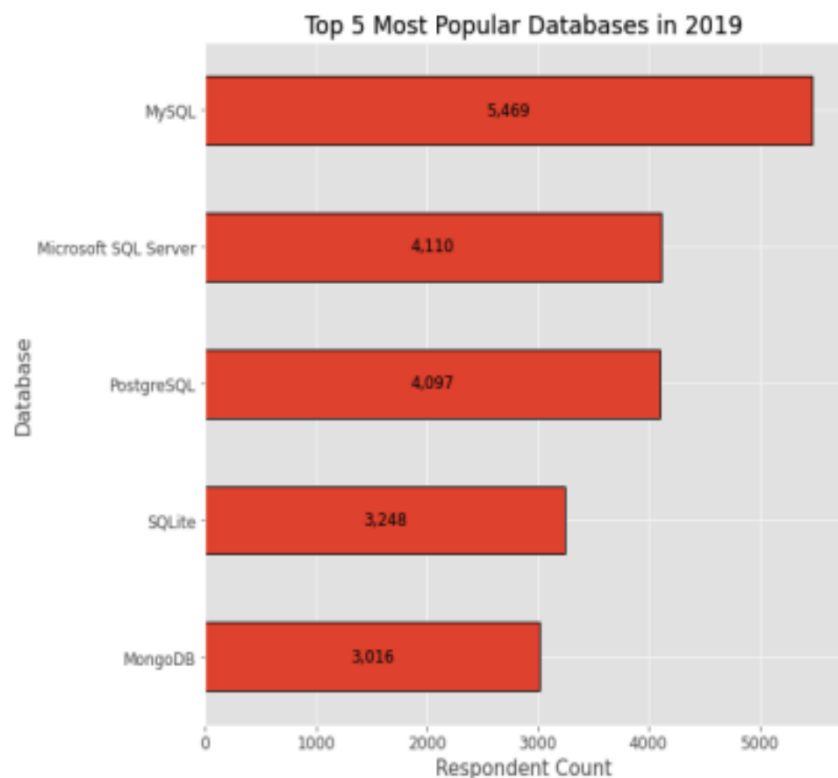

- JavaScript and HTML/CSS were the most popular in 2019 and will likely remain so the following year.
- SQL was popular in 2019 and will likely remain so.
- Decreasing interest in PowerShell/Bash.

Implications

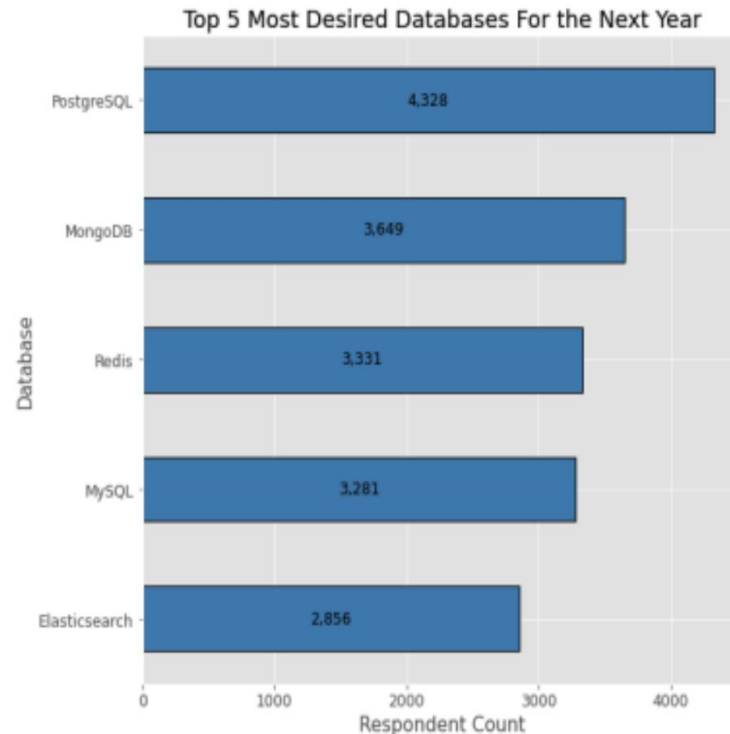

- Web development is still in high demand, and JavaScript and HTML/CSS remain the dominant languages
- SQL remains the preferred language for big data storage and querying
- Python's rising popularity likely reflects the growth of AI and ML work

DATABASE TRENDS

Current Year

Next Year

DATABASE TRENDS

- FINDINGS & IMPLICATIONS

Findings

- SQL database programs were the most popular in 2019, with MySQL in the lead.
- PostgreSQL is gaining popularity over other SQL database programs, and it was the overall most desired database for the next year
- MongoDB was popular in 2019 and gaining interest

Implications

- There appears to be increasing developer preference toward open-source database programs
- NoSQL database programs are gaining popularity, which likely reflects a growing need to handle non-relational and unstructured data

DASHBOARD

The following link contains the full, interactive Cognos dashboard summarizing (a) current technology use, (b) future technology trend, and (c) demographics of the survey respondents :

<https://datapatform.cloud.ibm.com/dashboards/41527516-6d9d-4a36-bf1c-b6a0e2c6381b/view/4c22f20607b114c461e2bde4079a780f79352258b0bbd552848d7b490a607597a96041c3c87c4e59d3185765f0b8125ec0>

DASHBOARD 1: Current Technology Use

Top 10 Programming Languages

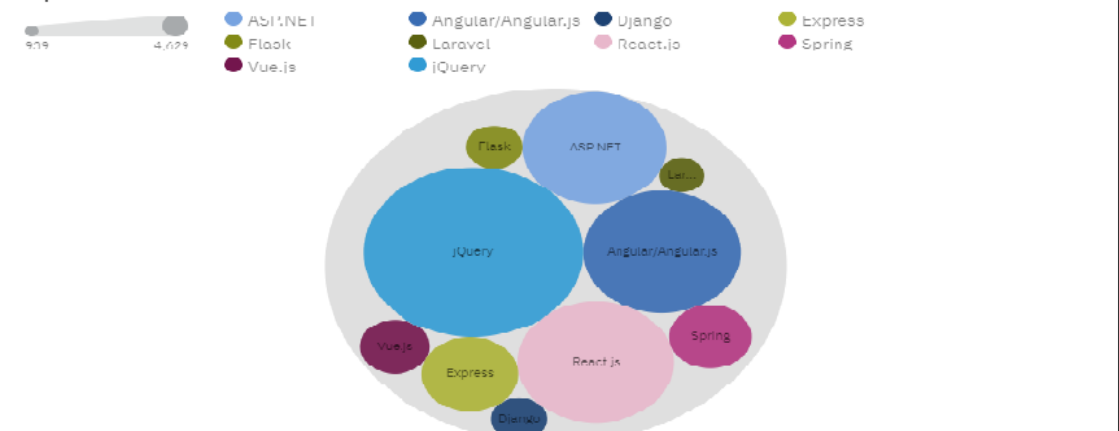

Top 10 Databases

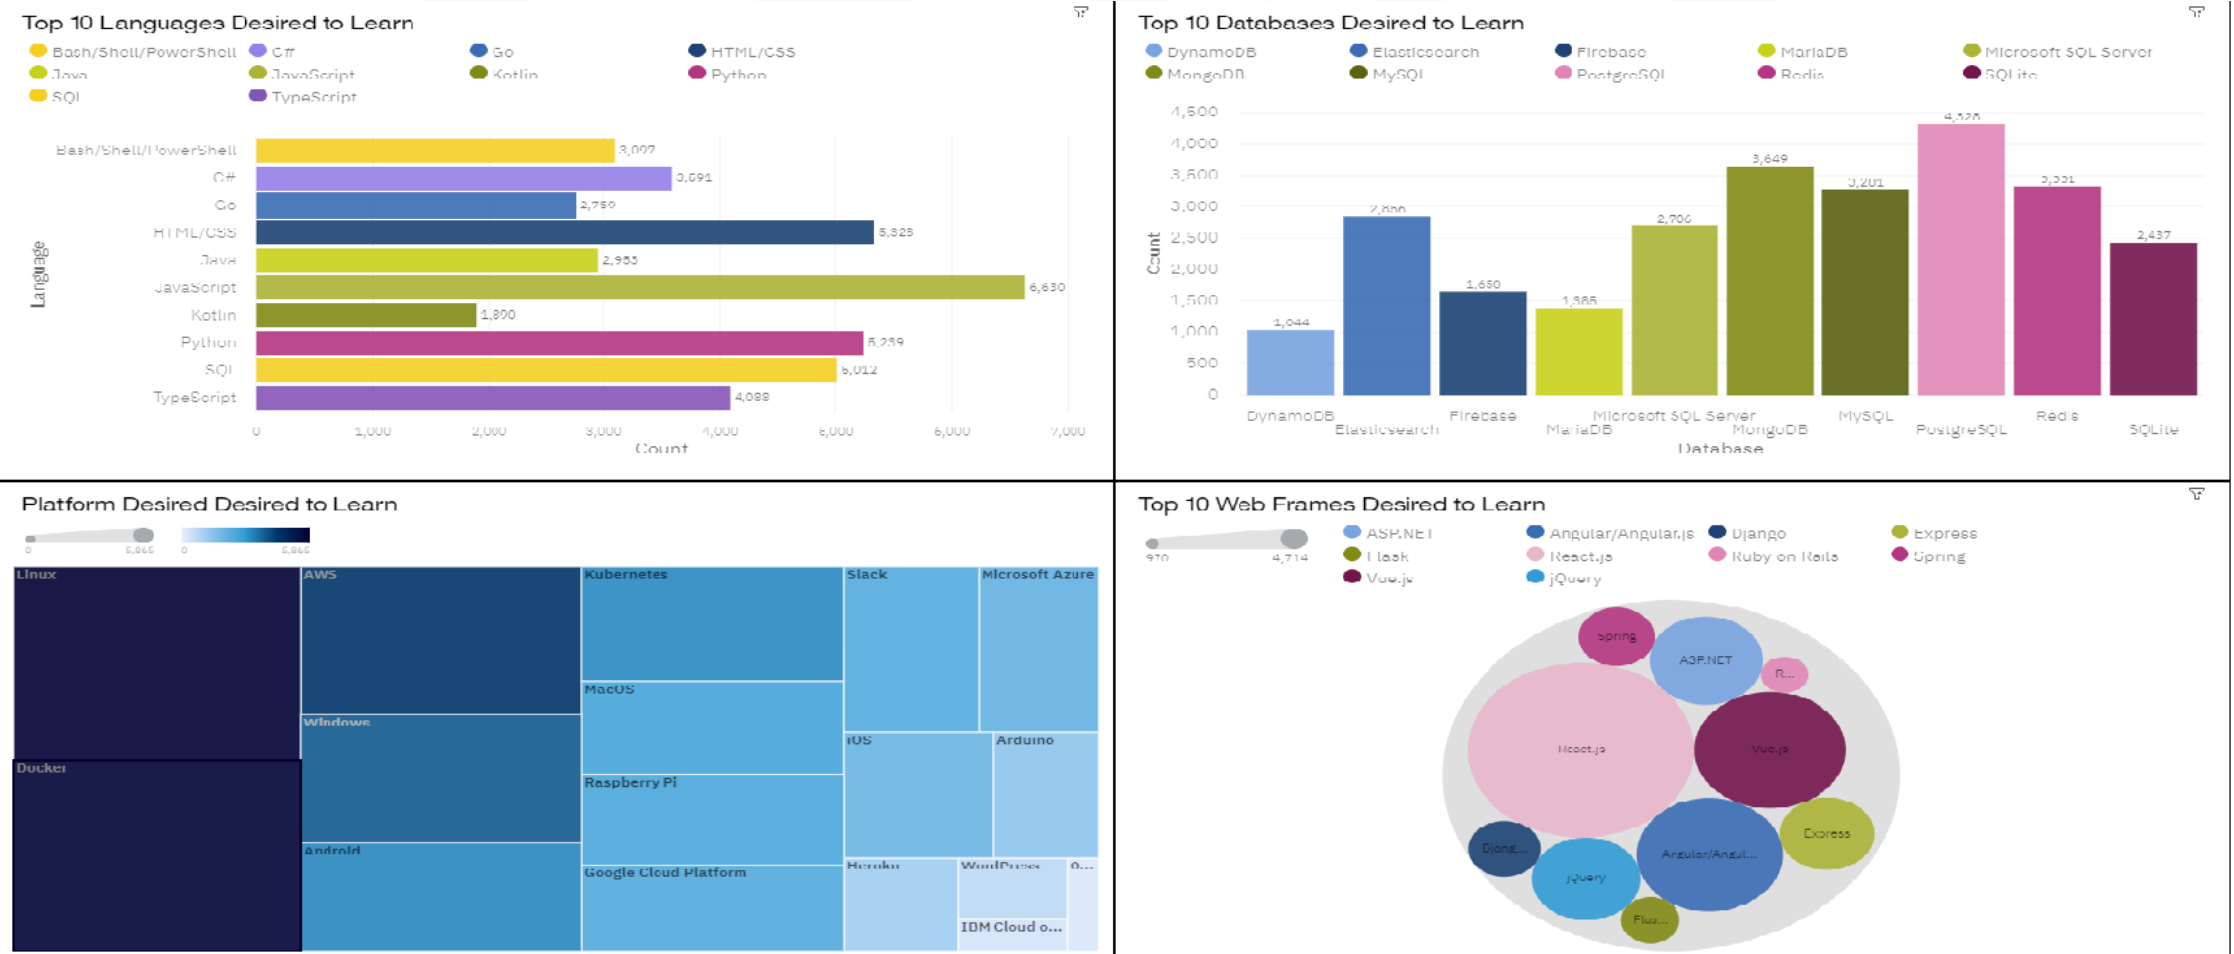

Preferred Work Platform

Top 10 Web Frames Worked With

DASHBOARD 2: Future Technology Trend

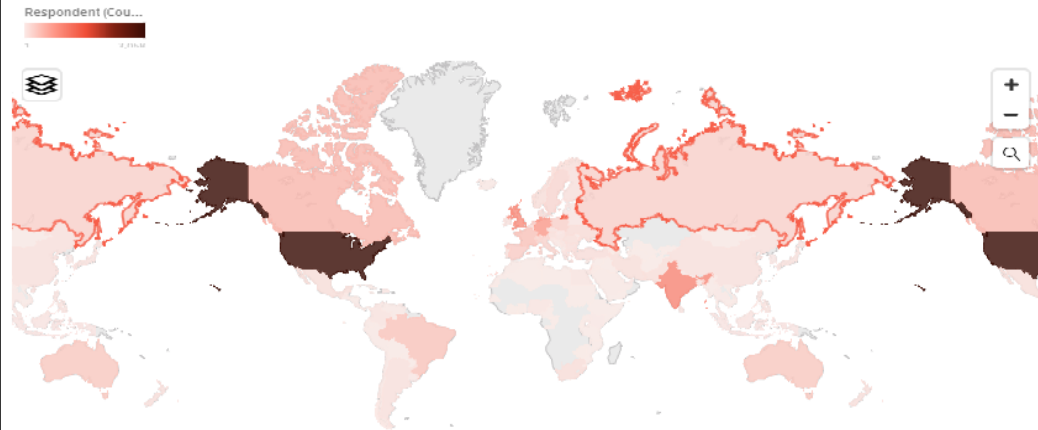

DASHBOARD 3: Demographics

Respondent Classified by Gender

Gender
● Woman ● Man

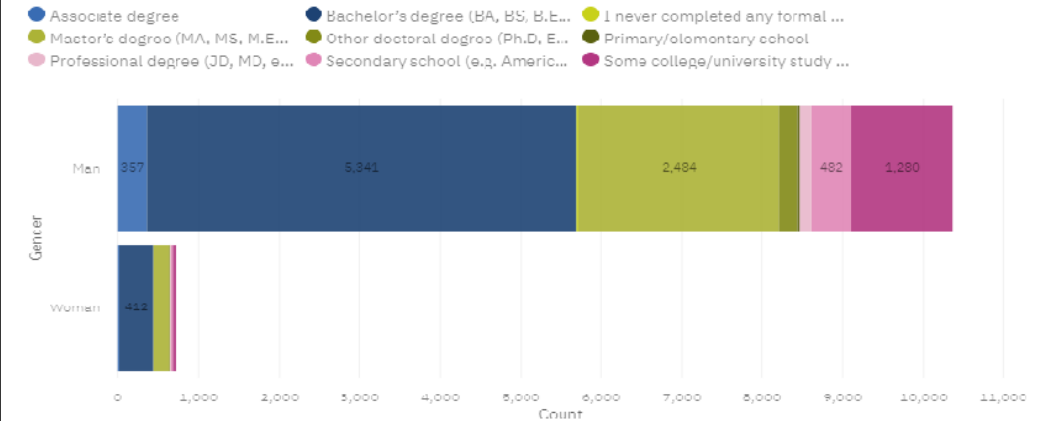

Respondent Count by Country

Respondent Count by Age

Respondent Count by Gender, Classified by Formal Education level

DISCUSSION

Taken together, the findings yield insights into the following questions:

- What kinds of developer technologies are in top demand?
- Which technologies should prospective developers and data professionals be learning?
- Which technologies should educators place more emphasis on teaching in upcoming years?
- What does the distribution of annual compensation for developers look like?
- What is the developer demographic like? Is there a gender representation gap?

OVERALL FINDINGS & IMPLICATIONS

Findings

- High usage and interest in JavaScript and HTML/CSS remain high usage. There's also increasing interest in Typescript
- Increasing interest in Python
- A severe gender representation gap (in favor of men), despite median compensation being slightly higher for women

Implications

- Web development is still in high demand. Current and prospective developers may consider picking up Typescript in addition to JavaScript and HTML/CSS
- Policy makers, educators, and organizations should work to minimize the gender representation gap in addition to the technology divide between countries

CONCLUSION

A subset of data collected as part of the Stack Overflow Developer Survey was examined.

- The findings yielded numerous insights into the technologies most used and desired by developers in addition to the developer demographic
- Addressing training helps ensure there are educated workers for the future
- Training for women opens up another group for employers
